- Escalating bridge promotes balance and coordination
- Two slides of varying heights are great for kids young and old

Age Group: 5 to 12 years

Capacity: 39 - 55 children

Use Zone: 36' x 32'

Create a tight-knit community with the Nordic Village Recycled Plastic Play System from Play Mart. The lumber and grassy color scheme, paired with the engravings of a bear, moose, and wolf, perfectly encapsulates the essence of the woods. While the structure looks like it is made out of wood, a big portion of the structure is constructed using recycled high-density polyethylene. This helps to keep plastic out of landfills and out of nature! Made with future generations in mind, this playground spotlights a diverse selection of play activities. Young adventurers will have a blast crossing the Wiggle Step Bridge. Others will imagine they are climbing the mountains via the Rock Wall Climber. Once they reach the deck, they can go down one of two slides. Adventure seekers can tackle the 6-foot Wave Slide while newcomers will enjoy the smaller 4-foot Wave Slide on the opposite end.
