- Two slides reduce waiting times
- Can accommodate children of varying ages

**Age Group:** 5 to 12 years

**Capacity:** 52 - 83 children

**Use Zone:** 40' x 47'

---

The Oasis Recycled Plastic Playground from Play Mart creates a fun retreat for kids to play and exercise. The leafy green and lumber brown color scheme, combined with the thatched roofs, produces a tropical vibe. Best of all, Play Mart uses Recycled Structural Plastic (RSP) in its construction to produce a "green" and eco-friendly playground. Each end of the unit offers age-appropriate activities. Young children will thrive at the beginning of the unit, where the platform only reaches a height of just above 3-feet. A small climber and a Gear Panel keep kids busy and best friends can glide down the 3-foot Double Slide. Climbers will rejoice at the taller end of the unit. Traditionalists will love hoofing it up the Rockwall while adventurers will coil and twirl around the Lazy Loop Climber, Double Loop Climber, and the Vortex Climber. A 6-foot Wave Slide culminates the end of the climbing journey.
