- Neat selection of climbers and a double slide
- Smaller footprint opens up placement options

**Age Group:** 5 to 12 years

**Capacity:** 25 - 31 children

**Unit Size:** 31' X 30'

The Panther Recycled Playsystem is a terrific playset that was designed for petite venues. Smaller schools, churches, or playgrounds will appreciate all the wonderful activities that the compact unit offers in such a small space. Additionally, the Panther Recycled Playsystem boasts an incredible array of exhilarating activities that improve both physical and mental acuity. A delightful collection of climbers liven up the unit. Kids can ascend up the Rock Wall Climber, Rope Net Climber, or challenge their athleticism with the Vortex Climber. Ignite imaginative play with the Store Front Panel or compose a symphony with the ADA Chime Panel. A 5-foot Duo Wave Flare Slide completes the playset and allows two kids to slide at once to maximize the fun. A laminated photograph of a peaceful panther provides a charming element to the playground. As a testament to nature, the playground incorporates recycled plastic into its design. For more information, contact a AAA State of Play sales representative.
