- A high Reversing Spiral Slide and a lower Double Slide
- Uses recycled material in parts of its construction

Age Group: 5 to 12 years

Capacity: 39 - 55 children

Use Zone: 31' x 31'

Play Mart's Rocky Tower Recycled Plastic Playsystem is an efficiently designed children's play area that has smaller installation space requirements while still standing impressively high. The highest platform is a dramatic 7-feet above the ground. Kids will want to push themselves to reach this apex as it is where the entrance to the thrilling enclosed tube of the Reversing Spiral Slide lies. Adventurous youth can scramble up the twisting metal rungs of the challenging Vortex Climber or take a straight vertical climb up the horizontal slats of the Timber Tower Climber built into the side of the unit. Smaller children uninterested or unable to scale quite so high can still enjoy a neat Double Slide that is located on the lower level and which is reachable via an ADA accessible Triple Stepper. Although kids will benefit from the muscle building exercise they will get from the climbers, this playground does not skimp on cognitively engaging amusements. There are Chandelier Chimes to create percussive music with and a colorful Mega Gear Panel whose mechanism twists and turns under kids' control.
