

## Summit Recycled Plastic Playground

**Price \$52,912.00**

### Highlights:

- Features three slides including a Reversing Spiral Slide
- Amusing activity panels alongside robust physical obstacles
- Portions of structure built from recycled plastic
- Inspirational decorative photo

**Age Group:** 5 to 12 years

**Capacity:** 69 - 95 children

**Use Zone:** 50' x 44'

Built to resemble a mountaintop castle, the Summit Recycled Plastic Playground is a visually exciting commercial-grade activity center designed to engage children creatively and help them develop their physical strength and dexterity. The trio of shade-providing roofs hanging over much of the platforms are shaped like the spires of a medieval fortress, complete with flags mounted high above. A vivid photo panel showing a victorious real-life mountaineer will inspire youth to get all the way to the top deck, either by way of the easy stairs at the Triple Stepper or through a tougher ascent up a climber like the looping metal runged Tree Climber. Once there, they will have the choice of shooting down either the enclosed Reversing Spiral Slide or one of the two open-aired slides. Kiddos less interested in taking that journey will not be left out of the fun either. There are both ground-level and upper-story play features built into the architecture. This includes a Sandbox that awaits those wanting to instead build their own castles or a sweet ADA Daytona Panel that lets kids imagine they are a professional racecar driver.
