- Climbers like the Overhead Ladder that help kids build muscle
- Great installation for smaller sites
- Portions of unit built using recycled materials

**Age Group:** 5 to 12 years

**Capacity:** 23 - 29 children

**Use Zone:** 29' x 28'

Ideal for areas that do not have a lot of property to work with, the Play Mart Tall Ships Recycled Playground features some exciting physical challenges that will get kids physically active and mentally engaged. Growing children benefit from play opportunities that will assist them in the development of the core muscle groups and upper arms. Installing a structure like the Tall Ships unit is a smart way to get youth engaged in exercise that has cleverly been disguised as freeform fun. Several different climbing options exist in this commercial-grade unit, from the traditional rungs of an Overhead Ladder to the more eccentrically shaped metal of a Spiral Loop Climber. And even if kiddos are not looking to challenge themselves on a climber like the Rock Wall, there is always the chance to just sit and relax on the ground level Kids Bench. Additionally, they can content themselves with joyful repetitions of a gentle circuit up the Triple Stepper and down the bouncy Wave Slide.
