

Boston Recycled Plastic Play System

Price \$16,103.00

Highlights:

- A smaller footprint that opens up placement options
- Fun Double Slide lets friends ride down next to each other
- Recycled plastics are used in the construction
- Includes physical climbers and imaginative activity spots

Age Group: 2 to 12 years

Capacity: 32 - 48 children

Use Zone: 28' x 28'

Play Mart's Boston Recycled Plastic Play System is a wonderful installation for site builders wanting to add a smaller sized kids activity center to a spot that is a little short on square footage. It is so economically designed that it is hard to believe that the unit contains slides, climbers, a music panel, benches, and a dramatic play element. Kiddos can haul themselves up the handled panels of an Arch Climber while a pal plays inspiring tunes on the ground-level Chime Panel to encourage their upwards progress. Once topside, children can twirl around an interactive Steering Wheel or shoot down the Double Slide with their best friend alongside them. Others can make their way up to the slide by way of the easy ascent of the Triple Stepper and its adjoining handles. Or they might stay at the base of the structure and run an imaginary business out of the Storefront Panel and its nearby Kids Benches.
