

## Francaise Recycled Plastic Playground

**Price \$15,359.00**

### Highlights:

- Double Slide lets friends zip down side by side
- Beautiful photo panel decoration of a French landscape
- Modestly sized for installation at smaller sites
- Uses recycled plastic in its posts, decks, stairs, and handrails

**Age Group:** 2 to 12 years

**Capacity:** 21 - 27 children

**Use Zone:** 26' x 27'

With colors evocative of a bright Spring day, the Francaise Recycled Plastic Playground by Play Mart fits well at sites that want to incorporate an impressive activity unit but who might lack a lot of real estate on which to place the unit. Large parts of this commercial-grade playscape utilize recycled plastic material, making it a perfect buy for those working towards a “greener” playground plan. A handsome photo panel is part of the main body of the architecture and it displays a stunning picture of rural France. Children who want to climb straight to the top to get access to the Double Slide can ascend up a Pipe Ladder or a curving metal Tree Climber. Little ones looking for an easier way up can make use of the gentle steps at the Triple Stepper and its attached handles. After they are done developing gross motor skills through climbing and sliding, kids will have chances to cognitively enhance their brains through pretend play with aspects like the upstairs Steering Wheel or the downstairs Storefront Panel.
