- Can accommodate multiple groups of kids simultaneously
- Ground level and upper-platform activities

**Age Group:** 2 to 12 years

**Capacity:** 40 - 60 children

**Use Zone:** 33' x 46'

Play Mart's Marconi Recycled Playground system is a commercial-grade activity unit that will help you transform your park, schoolyard, or shopping plaza into a rollicking ocean fit for high seas adventures. This nautical-themed structure will enliven any environment and inspire attending kids to immediately begin pretending they are brave sailors or fearsome pirates. The sea-like mood is secured via the unit's front portion that is shaped to resemble a ship's bow. This is matched by the facsimile rigging and sail mounted high overhead. Little scattered details like seahorse and dolphin decorations and blue and white painting finalize the entertaining vibe the structure aims for. Youth will develop their aerobic ability as they run back and forth over the Sloping Clatter bridge on the way to a 5-foot Tunnel Slide. Alternatively, more introspective kiddos can marvel at the crazy shapes they will see through the ground side Teleidoscope or act like they are selling fishing gear out of a little imaginary business at the Store Front and its two adjacent Kids Benches. And since Play Mart's Marconi Recycled Playground incorporates recycled plastic material in its construction, you can be pleased knowing that less litter is finding its way into real-life oceans and waterways.
