

Tiger Recycled Plastic Playsystem

Price \$21,044.00

Highlights:

- Modest structural footprint ideal for smaller sites
- Three climbers of different challenge levels
- Duo of slides to choose between
- Exciting photo panels of actual tigers

Age Group: 2 to 12 years

Capacity: 33 - 42 children

Unit Size: 27' x 36'

Play Mart's Tiger Recycled Plastic Playsystem is a superb commercial-grade unit for site builders looking to install an item that offers a variety of activities while still being able to fit into a limited space. From the get-go, kids will be jazzed to wander around the architecture of this structure. The decorative photo panels installed in the body of the unit display vivid photographs of tigers in the wild. Children love animals and they will become inspired by this big cat imagery as they climb and prowl around the playscape just like a tiger. Little seekers will quickly discover the two different slides available to careen down: a Straight Chute Slide and a Turning Slide. Each is different enough in size and shape to make kids want to use both. There are a multitude of climbing opportunities too, including a Pipe Ladder, an Arch Climber made of graspable posts, and a Rock Wall Climber. A manageable series of steps is available for those wanting to get up to the slides without climbing. And with a large portion of the Play Mart Tiger Recycled Plastic Playsystem being built of recycled plastic, you can buy one knowing that you are doing your part to help keep the larger environment these animals live in free of man-made litter.
