- Built partially from recycled plastics
- Thatch-like roofs provide shade

**Age Group:** 2 to 12 years

**Capacity:** 22 - 33 children

**Use Zone:** 28' x 26'

---

Play Mart's Waikiki Recycled Plastic Play System is a smaller commercial-grade playscape that presents a fun island-themed activity location that kids will love. A beachy photo panel pairs nicely with the sea blue roto-molded slides and tunnel and bright white paneling to really drive home the theme of this structure being a tropical getaway. Youngsters can pair up to zip down side-by-side on the 3-foot Double Slide or go solo to brave the slightly larger 4-foot Wave Slide. Those looking to sit and converse can relax on the Kids Bench located on the lower level. Also on the ground is an ADA accessible Driving Panel that lets children imagine being a ship's captain piloting a naval vessel all while peering out at dazzling imagery by way of the attached Teleidoscope. The tropical thatched roofs provide ample shade to help keep kids safe from damaging sun rays on overly bright days. These roofs are made of a synthetic material that is resistant to damage from bugs and rot. Large parts of the Play Mart Waikiki Recycled Plastic Play System are composed of recycled plastic (decks, posts, railings, and steps) that is resistant to rust and graffiti.
