

Castle Court Recycled Plastic Playsystem

Price \$127,108.00

Highlights:

- Can accommodate over 100 children at once
- ADA accessibility ramp provides upper platform access
- Physical challenges, musical instruments, and interactive activity panels
- Heavy use of recycled plastic in parts of the construction

Age Group: 2 to 12 years

Capacity: 135 - 180 children

Use Zone: 59' x 56'

The Castle Court Recycled Plastic Playsystem from Play Mart is a commercial-grade playground installation that embraces a “green” philosophy in both its materials and design elements. Evocative of the layout of a medieval fort, the Castle Court makes use of recycled plastic material to build its posts, decks, steps, and railings. This nature-friendly aspect is further embraced by the playscape’s incorporation of animal imagery in the form of vivid photo displays of animals like minks, lizards, and butterflies. Children of different ability levels will be able to enjoy exploring this structure together thanks to an ADA accessible ramp that permits wheelchair users to get onto elevated flooring that makes up roughly half the higher level of the unit. Kids can then work together to puzzle out the rotating parts of the Oval Gear Panel or pretend to be working on weird machinery at the Gauges Panel. Other kiddos will be developing their muscles on climbers like the twisty metal of the Lazy Loop or Rock Wall Climber comparable to what they have seen grownups use at the gym. On top of that, there are even five slides to choose from, ensuring kids will stay active and busy for hours on end.
