

Bear Mountain Recycled Playground Climber

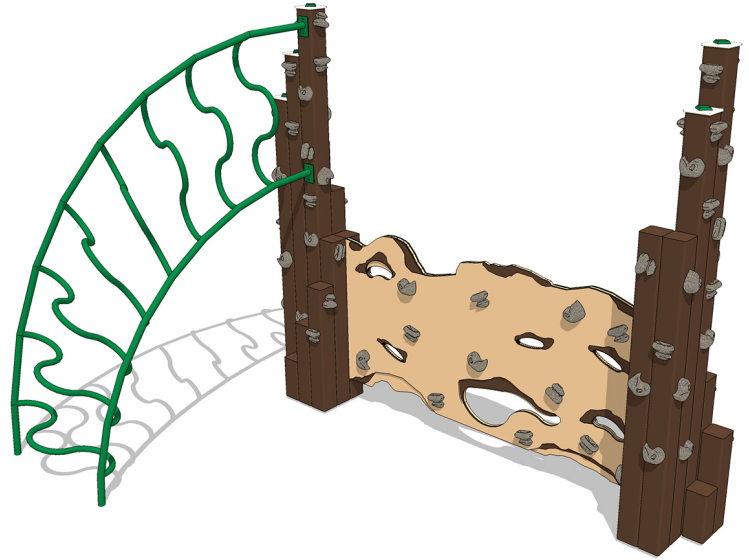

Price \$15,948.00

Highlights:

- Twisting metal rungs and handgrip covered panel and posts
- Multiple levels of climbing challenges
- Built partially of recycled plastic material
- Great way for kids to develop core muscles and limb strength

Age Group: 5 to 12 years

Use Zone: 21' x 26'

Play Mart's Bear Mountain is a stellar independent climbing installation that is constructed partially from recycled plastic materials, making it an ecological playground addition that will be sure to get kids exercising in a fun way. There are multiple layers of challenge incorporated into the unit. Smaller children can start by trying out the central panel wall. It features both wide gaps to mount shoes to get a foothold and a variety of knobby hand grips. Youth will be making their way up and over the wall in no time! From there, kids can progress to taking on the two taller vertical tower posts before facing off with the complicated angles of the metal rungs on the attached Vortex climber. The Bear Mountain climber has a smaller footprint to facilitate placement decision making and it can accommodate 3-4 children at a time. With their huge potential to help children improve posture and build kinesthetic skills, smart playground designers know the benefits of including climbers like this at a site.
