

Half Dome Climbing Unit with Recycled Plastic

Price \$17,623.00

Highlights:

- Variety of climbing surfaces for different skill levels
- Larger size lets groups of kids play at once
- Built partially from recycled materials
- Ideal for parks or schools

Age Group: 5 to 12 years

Capacity: 18-24 children

Use Zone: 31' x 20'

Play Mart's Half Dome Climbing Unit is a tough children's playground unit that is sure to provide kids a rigorous challenge as they test out its variety of scalable surfaces and grips. With three different sections of varying physical challenges, there are areas for novice, intermediate, and skilled climbers alike. Beginners can start off trying to pass over the shorter wall that is generously covered in asymmetrical cut-outs and knobby hand grips. From there, kids can proceed to one of the two harder obstacles: a duo of tall post towers or the crazy twists and turns of the pair of metal runged Vortex Climbers. Studies show that including these types of play features on your site will help kids develop their spatial reasoning, muscle strength, and endurance. And since Play Mart's Half Dome climber is built partially from recycled plastic, it makes a smart buy into an even wiser decision.
