

10-Foot Recycled Plastic Overhead Playground Ladder

Price \$5,065.00

Highlights:

- Great for fitness trails or playgrounds
- Portions of construction made of recycled plastic
- Resilient stainless steel hardware
- Features 4 Posts, 4 Caps, 4 Supports, 2 Handles & Step

Age Group: 5 to 12 years

Use Zone: 25' x 18'

Play Mart's Overhead Recycled Plastic Overhead Playground Ladder is an entry in their Play-Fit line of outdoors exercise equipment that is as equally at home on a workout trail as it is at a schoolyard or park. The dependable design uses a horizontal series of stainless steel piping that acts as a series of hand grips that will help users develop upper arm strength as they test their ability to carry their own weight from one end to the next. The unit employs step-up posts at one end of the ladder to help secure an initial position. This booster area then creates a naturally occurring traffic flow for users on the unit and decreases the likelihood of people approaching the ladder from two opposite directions. The Overhead 10-Foot Ladder is made of stainless steel hardware, roto-molded plastic, and a decent amount of Play Mart's proprietary Recycled Structural Plastic (RSP), which uses 100% recycled post-consumer plastic.
