

Tornado Recycled Plastic Overhead Spinner

Price \$4,351.00

Highlights:

- Three aluminum rings encourage collaborative spinning
- A-post frames use recycled plastic for an eco-friendly design
- Protective rubber cover on the swivel mechanism creates a durable build

Age Group: 5 to 12 years

Add a spinning element to your playground with Play Mart's Tornado Recycled Plastic Overhead Spinner play activity. Up to three kids can spin at the same time on the three aluminum rings. The unit is a fun activity that is also an exceptional way to increase physical fitness. Hanging onto the rings increases hand and forearm strength. Core muscles will engage to stay balanced as kids spin. Mentally, a child's kinesthetic awareness will also improve as they try to stay away from their friends while twirling around. A spring and chains at the top grants the handles more room to move as kids swivel around. This free-standing commercial-grade structure will make a great addition to a schoolyard, park, or activity plaza. The strong posts and frame use a combination of materials to create a robust base that will handle multiple kids playing on it. Eco-friendly, the A-Frame posts are built using Recycled Structural Plastic (RSP). Contact a sales representative for more details.
