

ADA Accessible Regal Rectangular Single Pedestal Frame Picnic Table with Attached Seating

MSRP \$2,145.00

SALE \$1,824.00

Highlights:

- Elongated tabletop allows easy access for wheelchairs
- Powder coated framework creates a resilient finish
- Textured polyethylene tabletop and seats resists scratches
- Expanded metal increases airflow to keep guests cool

The modern appearance and durable materials are just a few of the selling points of the ADA Accessible Regal Rectangular Single Pedestal Frame Picnic Table with Attached Seating by Webcoat. The space is approachable by people of multiple ability levels, as a 24-inch portion of the overhanging tabletop is free of any blocking underneath. With no support pedestal below to run into, a wheelchair user is able to sit against the table itself. This heartily built unit is composed of a tough metal framework which is finished with a powder-coated paint application. The connected seats and tabletop are covered in a textured polyethylene. Both the frame and these coverings are capable of being colored in custom tones different from those shown here, with the frame being powder-coated and the tabletop and seats covered with a polyethylene layer. Please reach out to a AAA State of Play salesperson to learn more about scheduling and currently available alternatives. This 6-foot long table is purchasable with an in-ground mount for soft Earth or with a surface mount for concrete grounds.
