

Downtown Straight Standard Style Park Bench without Back

MSRP \$952.00

SALE \$809.00

Highlights:

- Choose between a 2 or 3 seat option
- In-ground, surface, and portable mounts are available
- Powder and textured polyethylene coats create a durable unit
- Features a heavy-duty frame

The Downtown Straight Standard Style Park Bench without Back offers a sleek and slim seating option to add to your sidewalk, place of business, or park. Textured polyethylene covers the #9 expanded steel to make up the seats. The polyethylene is UV-stabilized to prevent fading even during constant exposure to the sun. It is also incredibly hard to chip off, helping to keep it looking like new even after years of use. Smaller venues will love the compact size that the 2-seat option offers while larger environments will like the 3-seat unit to seat more people. Because the bench is slim, you can add multiple benches next to each other to create as much seating as needed without taking up too much space. The unit uses heavy-duty 2-3/8" powder-coated steel tubing to create a sturdy and durable base. Both color finishes can be customized to your preference. Keep the Downtown Straight Standard Style Park Bench without Back mobile with a portable mount or position it in place with a surface or in-ground mount.
