

4-Station Recycled Plastic Fitness Station

Price \$9,454.00

Highlights:

- A handy package for purchasing several fitness units together
- Proven exercises for improving strength and dexterity
- Helpful signs provide clear direction for use of each item
- Built partially from recycled plastic materials for an eco-friendly unit

Age Group: 5 to 12 years

Play Mart's 4 Station Recycled Plastic Fitness Station is a collection of exercise stations that offer activities that are proven to help practitioners improve their health, boost their muscle growth, and build their confidence. If you are a site designer looking to build a fitness trail or park, look at how much time you will save once you see all the items included in this collection. A Chin-Up station features three bars at different heights so users of all sizes can begin developing their upper arm strength. The Sit-Up bench will assist in the increase of core abdominal power and can facilitate stretching or be used for pushups. The Vaulting Beam's inclined bar lets an exerciser pick where they are most comfortable leaping over. And rounding out the set is a duo of Parallel Bars that will be sure to augment users' endurance and upper torso power. All four exercise stations come with instructional signage and the units are built largely from recycled structural plastic.
