

Castle Rock Recycled Plastic Climber

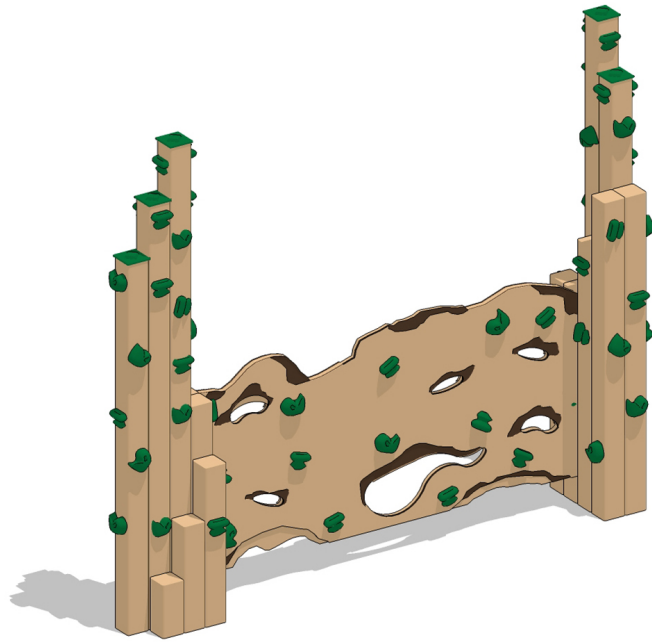

Price \$14,274.00

Highlights:

- Climbing helps children develop gross motor skills
- Knobs on front and back of the unit let multiple children play at once
- Varying climbing heights for different skill levels
- Strategically placed handles facilitate scaling

Age Group: 5 to 12 years

Use Zone: 24' x 15'

Smart playground designers know that it is critical to provide children access to equipment that will promote physical strengthening and body control. Play Mart's Castle Rock Recycled Plastic Climber fits the bill in this regard. Both the front and back of this economically sized unit are usable by kids wanting to scale upwards, either over the modestly sized central wall or to the tops of either of the two taller bookending posts. The range of heights incorporated into the climber lets users of different skill levels play simultaneously, so nobody ends up feeling left out. As children scramble up, down, and across, they will be growing key muscle groups, improving their dexterity, and mastering gross motor skills. The product is generously affixed with easily grabbable knobs and multiple footholds to help kids along the way. The Castle Rock Recycled Plastic Climber is also built largely of Play Mart's proprietary Recycled Structural Plastic, making it a greener solution for those wanting to make more ecological purchases.
