

Recycled Plastic Double Arch Climber

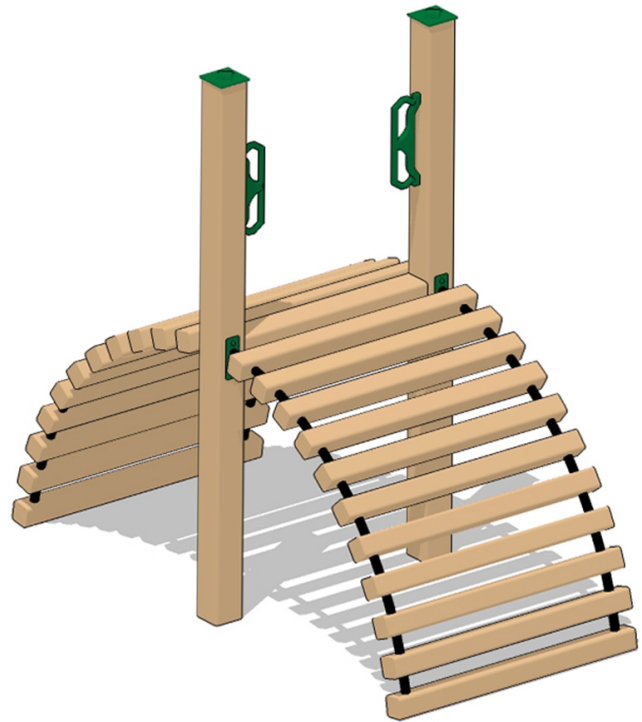

Price \$2,198.00

Highlights:

- Climbers promote kinesthetic learning and muscle growth
- "Green" construction that uses recycled plastics
- Strategically spaced out rungs resist fall throughs and pinching
- Kids can play on top of or below the installation for added fun

Age Group: 5 to 12 years

Use Zone: 22' x 17'

Play Mart's Recycled Plastic Double Arch Climber is a commercial-grade playground installation that uses a simple but effective design to create a rewarding activity location. This unit permits kids to either scramble up and over the half-circle of slats or congregate beneath the unit. The slats and posts are made of a Recycled Structural Plastic, which means that your purchase is helping prevent unnecessary plastic waste from further accumulating in landfills. This material also requires less maintenance than a traditional wooden climber as the plastic will not degrade from exposure to insects. The slats also will not splinter as a wooden playground item might, reducing the chances of injury. The remainder of the climber uses tough stainless steel to finish its construction, like in the two convenient handles attached to the posts at the apex of the curve. The economical footprint of the Recycled Plastic Double Arch Climber enables you to place it in a variety of locations, which can be a big help if you are designing a playground at a smaller site.
