

Flagstaff Recycled Plastic Vertical Climber

Price \$4,709.00

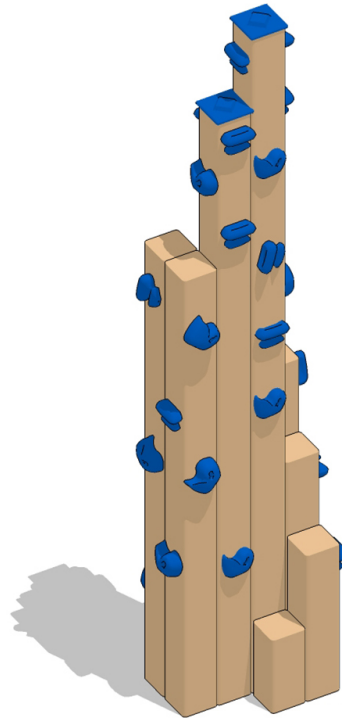

Highlights:

- Ascending series of steps to help kids start climbing
- Numerous knobby handholds that resemble rocks provide a secure grip
- Posts of differing heights offer varying degrees of difficulty
- Ecological unit built with large amounts of Recycled Structural Plastic

Age Group: 5 to 12 years

Capacity: 3 - 4 children

Use Zone: 15' x 14'

The Flagstaff Recycled Plastic Vertical Climber by Play Mart is a sturdily built column of variously sized posts collected together to make one exciting playground object for kids to ascend. The variety of post heights are arranged to present children with a stairlike series of steps that will help them as they hike higher towards the sky. And the posts are generously affixed with easily graspable knobs to further assist kids looking to boost their confidence by reaching the very top. Climbing is also shown to help little ones boost their muscle strength during a critical growth period. In addition, these types of activity spots promote a tyke's kinesthetic learning and enhance body control. The smaller base area of this product makes it easier to place when designing a playground for a property where space is at a premium. Play Mart's Flagstaff Recycled Plastic Vertical Climber is made largely from Recycled Structural Plastic, which means you will be helping keep our planet "green" for the next generation.
