

Matterhorn Recycled Arch Climber with Vertical Post

Price \$7,855.00

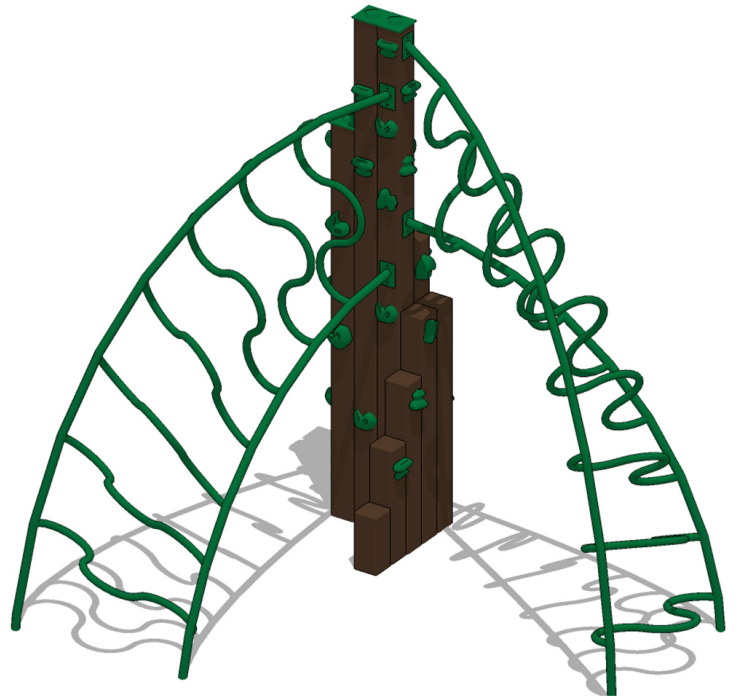

Highlights:

- Uses eco-conscious materials in form of recycled structural plastic
- Presents different climbing challenge levels
- Central post tower is affixed with many easily graspable knobs
- Proven exercise to help kids build strength and dexterity

Age Group: 5 to 12 years

Capacity: 9 to 12 children

Use Zone: 24' x19'

The Matterhorn Recycled Arch Climber with Vertical Post by Play Mart provides children a physical activity area that's sure to get them excited while also incorporating some healthy exercise into their day. Studies have shown that climbing areas on playgrounds give kids the chance to explore and enhance their gross motor skills and perception ability. Youth learn how to better control their body's positioning in order to achieve their goals of ascent and descent. The Play Mart Matterhorn features two twisting arching metal ladders that are constructed of durable stainless steel. These neatly warped rungs each attach to a central multi-tiered tower whose surface is generously decorated with knobby grips that resemble rocks. This tower is built of flat-topped posts of various heights that let kiddos place their feet for better positioning to keep scrambling upwards. The posts are built of recycled structural plastic, which makes the Matterhorn climber a smart purchase for playground designers wanting an eco-friendly approach for their park or schoolyard.
