

Pioneer Recycled Playground Fitness Course

Price \$25,081.00

Highlights:

- Variety of upper body exercises target several muscle groups
- Includes recycled materials in its construction to reduce waste
- Open air design allows large groups of kids to play at once
- Develops strength, coordination, and agility

Age Group: 5 to 12 years

Capacity: 12 - 16 children

Use Zone: 43' x 40'

The Pioneer Recycled Playground Fitness Course from Play Mart provides a total body workout. The diverse selection of overhead climbers and a stepping bridge keep patrons in motion and active. To work on their hand and grip strength, a pair of gliders allow kids to hover above the playground floor as they slide across the unit. A turning overhead ring ladder will help kids develop their upper body strength and hand-eye coordination as they swing from handle to handle. To work on leg strength, young athletes will test their agility, balance, and coordination on the step bridge. The center of the unit features the overhead swinging Tornado activity. A trio of handles allows three friends to swing in circles at once. In order to handle the weight of multiple people at once, a combination of materials creates a robust and sturdy base. The posts are made using Play Mart's proprietary Recycled Structural Plastic to reduce plastic waste.
