

Individual Recycled Quad Block Balance Stepper

Price \$354.00

Highlights:

- Sold individually to allow maximum customization
- Can be combined with other steppers to create a unique trail
- Uses Recycled Structural Plastic (RSP) for a “green” build
- Great way for a child to work on balance and coordination

Age Group: 5 to 12 years

Add a stepping trail to your venue with Play Mart’s Individual Recycled Quad Block Balance Stepper. Each step is sold separately, granting you the ability to add however many platforms you need to create a fun elevated path for your play area. This intuitive activity is a great addition to any playground or park trail. Each step features four posts put together to create a square base that kids can stand on. Youngsters will test their athletic abilities as they hop from one step to the next. This creates a splendid exercise that promotes balance, agility, leg strengthening, and coordination. These blocks can work as a separate activity spot or they can be placed on an existing playground to connect two activities together. Kids can play pretend and hop across the blocks to stay off imaginary lava. The steps use Recycled Structural Plastic to reduce their carbon footprint. This proprietary plastic has the appearance of wood but it will not splinter or rot, creating a low-maintenance unit that will look good for years to come.
