

Recycled Plastic Playground Seesaw

Price \$3,293.00

Highlights:

- Fantastic way to work on balance
- Environmentally-friendly build uses recycled material
- Available in 8' and 10' sizes to fit your needs
- Recycled plastic looks like wood but without the pesky maintenance

Age Group: 5 to 12 years

Play Mart's Recycled Plastic Playground Seesaw offers a modern and unique twist to the classic teeter-totter design. The structure is a tremendous way to work on core strength and balance. A long deck provides ample room for a multitude of children to play at once, creating an inviting atmosphere that will be sure to be tons of fun. Choose between an 8 or 10-foot long platform to fit your playground needs. Tires in the ground provide a springy foundation to keep the fun rolling. To prevent falls, there are two steel bars that children can hang onto as they play. They are covered in a textured powder coat to provide a durable, long-lasting color. Adding to the environmentally-friendly theme, the posts feature recycled plastic. It resembles wood but does not attract termites or fungi and will not rot or produce harmful splinters. Contact a AAA State of Play sales representative for more details.
