

Recycled Plastic Overhead Super Glider

Price \$6,215.00

Highlights:

- Step-up block provides an easy starting point
- Develops kids' upper body strength and gross motor skills
- Four support bars stabilize the unit as kids glide
- Uses recycled materials in its build to create an environmentally friendly unit

Age Group: 5 to 12 years

Let kids fly across the playground with the Recycled Plastic Overhead Super Glider from Play Mart. This thrilling structure is a great addition to any playground at a school, park, or church. A step at the beginning of the unit gives youngsters a way to easily reach the ring handle above to start their gliding journey. There are handles on the side for kids to grab onto while they wait. Alternatively, these amenities offer great ways for kids to safely get off the unit as well. Once on, kids can hang onto the ring as they slide across the unit to get to the other side. This playground activity will enhance a child's grip, upper arm, and core strength as they glide across. Four metal bars support the posts to keep the unit safely stable as kids play. The posts contain recycled plastic in its build, helping to reduce waste and keep trash out of the environment.
