- Twisting overhead climbers strengthen muscles

Age Group: 5 to 12 years

Capacity: 18 - 27 children

Use Zone: 43' x 35'

The Pikes Peak Recycled Playground Fitness Climber with Steppers and Balance Beam is an energetic child's paradise! From challenging climbers to playful stepping stools, there is something for everyone to enjoy. Children will be eager to traverse the twisting and looping metal bars of the Deep Rung Loop Climber and the Vortex Climbers attached to the sides of the rock wall. Combined with the zig-zagging Double Jog Ring Ladder, kids will strengthen their upper bodies and improve their coordination. Not neglecting the lower body, a neat selection of steppers engulf the central structure. Young athletes can pretend they are Olympians as they walk across the Balance Beam while others can cheerfully step across the amusing butterfly, mushroom, and log-shaped steppers. This hodgepodge selection of activities provides a diverse range of exercises for children to enjoy. Best of all, it incorporates recycled material in its build to produce an eco-friendly structure that helps curb plastic waste.
