- Post and sanitizer holder are color customizable

The Post-Mounted Pump-Style Hand Sanitizer Holder (Compatible with 28 oz. Pump Bottles) from Webcoat is a good buy if you are looking to assist site visitors in staying healthy. Accessible sanitizer can help kill germs that make folk sick. Nobody likes getting ill and children are prone to spreading something around. This is especially likely after a play day on equipment used by crowds of kids. Locations without access to soap and water should provide guests with alternative means to ensure youngsters stay well. With this station, parents will have a spot to get their family's hands clean before leaving the park, mall, or playground. This unit keeps the sanitizer locked away behind a 20-gauge aluminum enclosure to prevent tampering. If you would like bright colors on the container or post, please speak to a AAA State of Play salesperson to learn more about available alternatives. Instructions for sanitizer use are printed in both English and Spanish. Please note, sanitizer and dispenser are not included with this product.
