- Lockable 20-gauge aluminum box prevents sanitizer theft

Help stop disease spread and keep your site's visitors happy and healthy with Webcoat's Post-Mounted Hand Sanitizer Holder (Compatible with 42 oz. Lever and Automatic Dispensers). This station can be surface mounted or in-ground mounted. Atop the durable post is a lockable 20-gauge aluminum containment box capable of holding a 42 oz. automatic or lever-style sanitizer dispenser (sanitizer bottle not included with purchase.) This container helps keep the sanitizer inside safe and stops unwanted thievery. This unit would be especially beneficial at a location that might otherwise lack a spot for visitors to clean their hands. Helpful directions in both English and Spanish are inscribed on the front of the container along with symbols that further express the purpose of the product. Both the post and the container of the Post-Mounted Hand Sanitizer Holder can be finished with a powder-coated paint application. If you are interested in customizing this unit, please speak with a AAA State of Play salesperson to discuss currently available colors.
