- Colors are customizable

If you are looking to help keep your site's visitors from unnecessarily spreading germs and making themselves sick, then the Hand Sanitizer Holder Add-On (Compatible with 42 oz. Lever and Automatic Dispensers) would be a great product to install at your site. This lockable metal container is made of strong 20-gauge aluminum and lets you keep a 42 oz. lever or automatic sanitizer dispenser connected to a wall or the side of a compatible trash receptacle (Sanitizer and dispenser are not included with this purchase). This product thus lets you install a helpful health tool at a spot you know will be most convenient to where people congregate at your site. Families and individuals will naturally make use of the sanitizer as they throw away trash leftover from a picnic or after finishing the day's playground activities. This product comes with helpful instructions printed on the front in both Spanish and English. The exterior can also be powder-coated in one of several different vibrant shades. Please call or email AAA State of Play to discuss which colors are currently available and to learn about lead times.
