### Highlights:

- Product can help reduce germ spreading at your site
- Powder coated to provide a polished long-lasting finish
- Connected receptacle promotes responsible waste disposal
- Available in multiple colors for customization

Prevent germ spreading with Webcoat's Post-Mounted Hand Sanitizer Holder with Trash Receptacle (Compatible with 42 oz. Lever and Automatic Dispensers). This one-stop-shop features a rectangular trash receptacle that allows patrons to throw their waste away while an overhead sanitizer holder helps guests clean their hands afterwards (sanitizer not included). This is helpful when soap and water is not close or available. The trash receptacle is constructed using 20-gauge aluminium while the dispenser enclosure uses 14-gauge steel for a lightweight yet strong build. A powder coat finish covers the unit to provide a durable finish. The sanitizer enclosure grants users a safe and easy way to disinfect themselves. Instructions are posted on the front in both English and Spanish, increasing its availability to users that speak other languages. An in-ground mount is available to place the structure in the earth while the surface mount is ideal for affixing the unit to concrete or other hard surfaces.
