

Outdoor Social Distancing Desk

MSRP \$548.00

SALE \$466.00

Highlights:

- 2-inch frame provides a stout base
- Thermoplastic coating protects the frame and can be easily sanitized
- Compact design simplifies social distance planning
- Portable/surface mount combination increases versatility
- Large assortment of color options available to customize the unit

Take the classroom outside with MyTCoat's Outdoor Social Distancing Desk. Made to handle the outdoors, the unit features a 2-inch frame with 1-½-inch bracing to provide a tough, durable foundation. The seat and desk are covered in a thermoplastic coat that resists scratching and chipping to protect the steel beneath. This finish also makes the unit easier to clean and disinfect after use. The expanded metal surfaces promote airflow to keep users cool and ventilated even during hot, sunny days. The seat and desk are attached to create a compact unit that can fit in your existing space or facilitate new social distancing layouts. A unique portable/surface mount combo is used so it can be kept mobile or be securely placed on a hard surface such as concrete or asphalt. A diverse selection of thermoplastic color options is available, allowing you to customize the desk to fit your venue or school colors. Talk to one of our knowledgeable salespeople for more details.
