

Rectangular Shade Shelter with 12 feet high Entrance Height

Price \$4,643.00

Highlights:

- 12 foot entrance height grants ample space for recreational activities
- Large color selection allows it to match any venue
- Protects kids from damage and discomfort of direct sunlight
- Helps prevent play equipment discoloration

Get the protection needed for your recreational area with the Rectangular Shade Shelter with 12 feet high Entrance Height by Superior Shade. At the largest available entrance height, this shade accommodates large play structures, seating and picnic tables, pools, and more. Don't let the weather keep kids from playing or families from gathering. This rectangular shade keeps the beating sun off of slides and spinners to prevent burning or discomfort during play. Shades can help prevent sunburns and the negative effects of overheating by keeping play areas cooled and comfortable. Additionally, they can also prolong the nice appearance of playground equipment by keeping the direct sunlight from discoloring or weakening it. An assortment of color options allow it to easily blend into the existing color schemes of schools, parks, or pools. You can opt for the inclusion of a glide elbow to make the installation and removal process easier. Choose from a variety of shade sizes that can suit the needs of many different playgrounds.
