Age Group: 5 to 12 years

Capacity: 55

Use Zone: 30' 3" x 30' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Children can reach and climb to infinity and beyond on the Interstellar Incline 3D Pyramid Net Climber. It is raised and stabilized by a powder-coated steel beam with rust-resistant paint that can withstand most weather conditions and climates, prolonging the life and appearance of the structure. Strong black nylon ropes weave in and out, up and down to create a web of challenging climbs from top to bottom. Children are strengthening and developing key muscle groups as they reach and pull themselves higher. Younger children can remain towards the bottom while older children head straight for the top, making it an excellent addition to a playground serving elementary-age children. This structure is designed to safely hold several little ones, promoting friendship and improving socialization skills. A friendly race to the top is a beneficial physical activity that can really make kids break a sweat while engaging in play. Contact the AAA State of Play sales team to talk about color options.
