**Use Zone:** 23' x 28'

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Few things are more recognizable on a playground than a classic tire swing. The Elite Series 3.5 inch Arch Post Tire Swing 8 Foot combines a vintage design with the modern understanding of safe play equipment. The best part of a tire swing is that it can move in any direction you can manage to push it. The frame of this swing has legs strategically spaced to give the swing plenty of room to swing. Kids can push each other in big circles or they can propel themselves any way they wish to go. Children tend to gather around the attraction, trading a few helpful pushes for a turn of their own on the swing. The tire is made from strong plastic for a more modern and safe material than a standard tire. And the swing bay structure is durably built with a contemporary streamlined design to suit any playground. For those who wish to double the fun, an additional tire swing bay can be appended either to an existing Tire Swing Bay or to an Arch Post Bay. This means that, regardless of which type of swing set you currently have, a new tire swing bay can be installed using a few simple parts as well as a complementary hardware kit. Ask our AAA State of Play sales team about color options and how to further customize your swing.
