COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Explore the cosmos on the Nebular Net Climbing Structure. The spectacular design features four support posts that hold lengths of nylon encased steel rope to create a sturdy and firm climber. The posts come in a variety of powder coated paint options, allowing you to customize the structure to match your school or venue's colors. This fun and challenging climber offers an excellent way for children ages 5-12 to work on their strength, coordination, and balance as they play. Cognitively, they will have to work on their motor planning skills as they traverse through the intricate collection of ropes. The far-out design will be sure to attract people from all over the playground. Best of all, its build is compact, allowing it to be placed in small areas and added near existing structures to create a fun adventure park that kids will love.
