### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The 5-feet Single Straight Hillside Slide by Playground Equipment Dot-com transforms existing embankments at your recreation site into exciting sources of childhood delight. This commercial-grade slide is great for playground managers wanting to enhance the beauty of present hills. It's also ideal for those who desire a slide but want to avoid the headache that comes from large scale digging. The unit's low sides and closeness to the ground enhance safety as children are much less likely to hurt themselves from any accidental spills. The rugged combination of galvanized steel decking and posts with rotationally molded plastic make this product more than capable of reliably handling years of regular use. The 5-foot height also makes this slide well suited for younger children who might be intimidated by larger slides on other parts of the playground. The 5-feet Single Straight Hillside Slide is available in the color shown or can be customized to better match your site's design scheme. Please speak with a customer service agent to learn more about available alternate colors.
