**Age Group:** 5 to 12 years

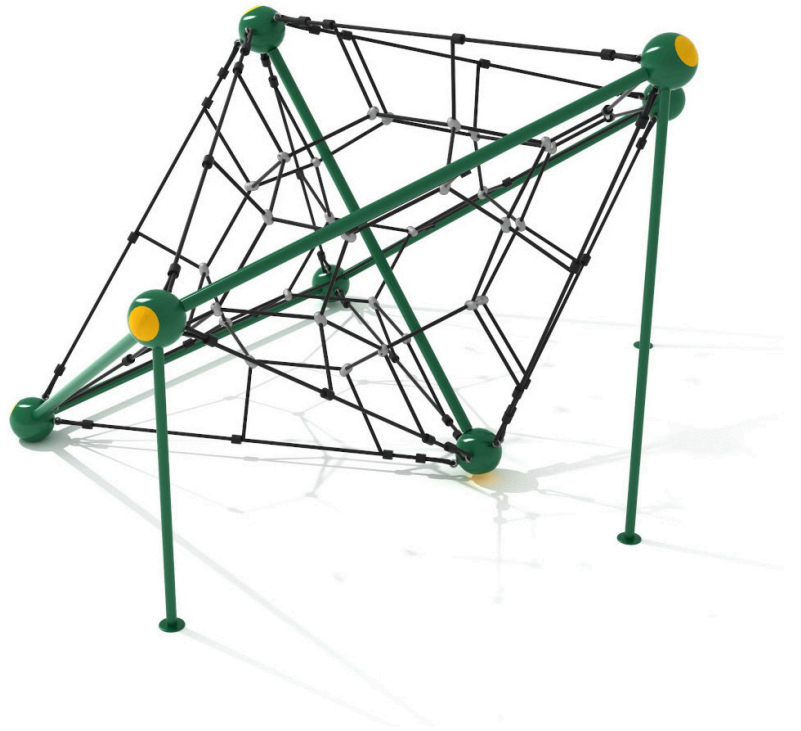

**Capacity:** 10-15

**Use Zone:** 22' 11" x 26'

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Solar Flare 3D Climbing Net by Playground Equipment Dot-com is a commercial grade installation appropriate for schoolyards, municipal parks, or church grounds. This product employs an elaborate web of nylon encased steel cables that crisscross in a dazzling geometric display that will be sure to get kids climbing in all kinds of different directions. Capable of handling up to 30 children at once, this climber is ideal for locations that need to provide healthy activities to small groups of visitors. The steel cable is rigid enough to support the weight of a child while also offering a comfortable texture to grasp onto, thanks to the soft nylon exterior. Climbing nets are a proven beneficial play item as they enable kids to develop their gross motor skills since they're required to rely on their physical strength to ascend and descend within the web. In the process, they exercise muscle groups in their arms, legs, and core. If you'd prefer different colors than what's shown here, please speak with a AAA State of Play salesperson, as the appearance of the framework (aside from the yellow caps) is customizable.
