**Age Group:** 5 to 12 years

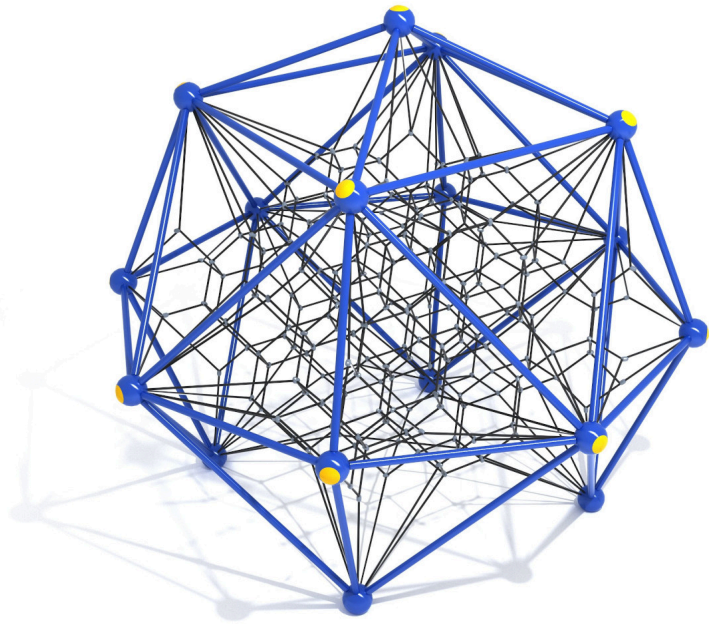

**Capacity:** 45-55

**Use Zone:** 29' x 29'

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Lunar Leap Rope Climbing Dome is a great way to get kids exercising and having fun at the same time. Whether it's installed at an apartment complex, school, or park ground, this commercial-grade network of nylon covered cable will get the attention of every kid around. The elaborate web of roping presents a bunch of lateral and vertical paths of movement, so everyone can set their own climbing goals. Climbing a complex installation challenges children's coordination and helps them develop spatial reasoning and build key muscle groups. The nylon covering laid over the cables is comfortable to touch and easy to hold onto. The robust steel framework is solidly constructed to ensure years of habitual use and will stand up easily against even the harshest weather. The body of the frame, aside from the yellow caps, can also be a custom color to better match an existing playground design. Please call or email to speak with a AAA State of Play salesperson and learn more about alternate color options.
