Capacity: 13-18

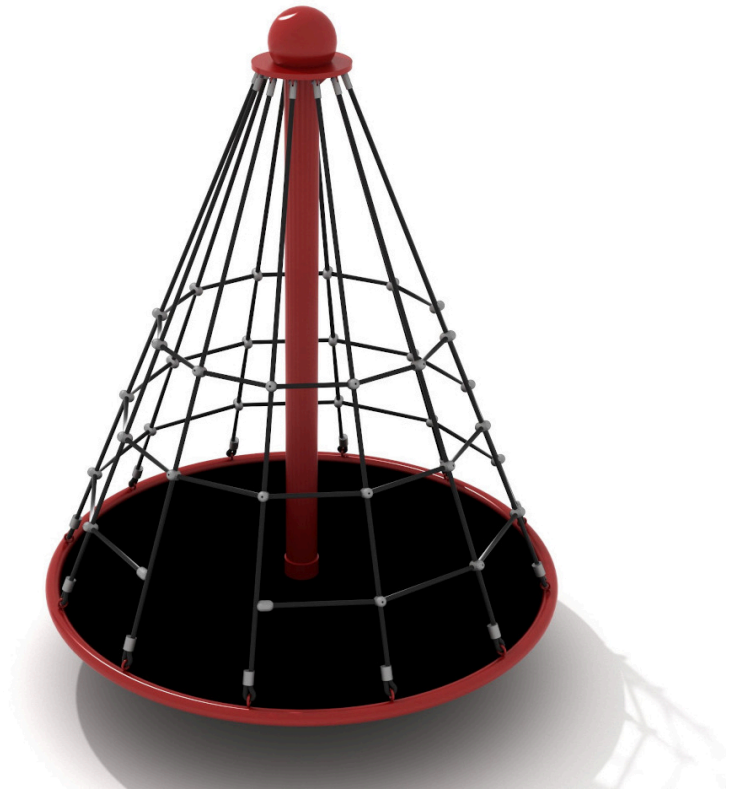

Fall Height: 60"

Use Zone: 24' 9" x 24' 9"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Kids will be eager to launch into fun with Playground Equipment Dot-com's Starship Orbiter Spinning Web Climber. This commercial-grade recreation product cleverly combines the rigging of a net climber with the rotational movement of a spinner to make for a memorable experience that children will be clamoring for. The angled grid of ropes is made of nylon covered steel cables that taper off at the top center point of the installation. The interior of the web of ropes can be accessed through one gap that's larger than the others near the platform base. Inside, little ones will laugh with delight as they're whirled around by friends or grownups rotating the ride from the outside. Kids wanting to ride on the exterior of the ropes while the unit is spinning will face the additional challenge of trying to hold on. Thankfully, the nylon is both easy to grip and comfortable on the hands. The Starship Orbiter Spinning Web Climber is available in a diverse range of colors, so you can adjust the appearance to match your site plans. Just call or email us to learn more about scheduling a color change.
