Capacity: 40-50

Use Zone: 41' 11" x 49'

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Project Longshot Rope Climbing Obstacle Course is a huge commercial grade outdoor recreation installation suitable for groups of children aged 5-12. Cleverly combining webs of rope alongside robust overhead rings, this obstacle course will be sure to get kids physically active and excited. Kiddos will instantly be drawn to any area this product is located, thanks to its visual complexity and multiple points of entry. Interconnected rope elements include a bridge, triangular and quadrilateral rigging, and two sizable geometric 3D starburst shapes. As they climb, children will unknowingly exercise critical muscle groups in their core and upper and lower torsos. They'll also be developing a better understanding of spatial reasoning and building their endurance. All the posts in Project Longshot are constructed of rugged stainless steel which is then finished with an enduring layer of powder-coated paint. The unit is available in the color shown or you can have the posts recolored to an alternate hue. Please speak with a customer service representative to learn more about alternate color options and discuss scheduling.
