ASTM F1487-17

CPSC PUB #325

The Swerving Spindle Standing Spinner by Playground Equipment Dot-com is a freestanding commercial grade spinner suitable for outdoor locations. Designed for solo play, the spinner employs a funky angular shape for its central post that the occupant will use to maintain a strong grip as they employ their own momentum to whirl about in place. Beyond the sheer joy of the experience, kids who spin around will also get the opportunity to enhance their balancing abilities and also test their strength, as a strong grip might be necessary in order to hold on and continue the ride. The Swerving Spindle Standing Spinner is built of tough stainless steel and polyethylene plastic that would work well in schoolyards, parks, or apartment complexes. These elements are available in the colors displayed or customizable to one of several alternate hues. Call or email us to learn more about additional color options and to discuss scheduling.
