Use Zone: 15' 11" x 22' 8"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Tires required, not included

The Flip Flopper Standing Playground Ride by Playground Equipment Dot-com is a cool update of a traditional seesaw. Instead of sitting down, users will instead stand upright while safely holding onto nearby handlebars. Secondly, this commercial-grade playground unit uses powerful springs rather than a central fulcrum to help riders generate the motions. While a single child can use the Flip Flopper alone, they'll find it's more exciting to recruit another to help bounce the springs. This can prompt kids to practice their teamwork skills in the process. The standing platforms are built of a resilient rotationally molded plastic that's amusingly shaped into decorative crabs. The steel framework is finished with powder-coated paint, which makes the unit physically durable and capable of maintaining its attractive appearance. The Flip Flopper Standing Playground Ride can be bought in the color shown here or you can have the steel framework altered to better suit an existing site plan. Just speak with our AAA State of Play sales staff to learn more about alternate choices and scheduling. Please note that this bouncer requires two rubber tires (one per seat), which you can source yourself or purchase from us.
