Capacity: 3-6

Use Zone: 16' 3" x 23' 3"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Playground Equipment Dot-com's Freestanding Curved Post Floating Bridge is an excitingly designed commercial-grade outdoor recreation unit that site managers can use to provide independent play to their visitors or as a connector between two existing structures. The raised path is slightly curved and generously covered with textured knobs and asymmetrical circles. This makes for an eye-catching design and presents a little bit of an extra challenge as kids will have to think through how to get from one side to the other. The Freestanding Curved Post Floating Bridge is built of galvanized steel, tough plastic, and vandalism-resistant nylon covered steel cables. All of these elements combined create a product that will stand strong and look great for a long time, even after habitual use and regular exposure to the harshest of weather. This bridge can be purchased in the color scheme shown on this page or you can customize its appearance to best match your location's design. Please speak with a AAA State of Play salesperson to learn more about options and scheduling.
