**Capacity:** 3-7

**Use Zone:** 21' 6" x 22' 1"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Independent Play Combination Manhole Rope Climber from Playground Equipment Dot-com is an exciting merger of vertical laddering and horizontal netting which will provide children hours of fun physical activity. Kids can reach the net by ascending up through or alongside bars of circular metal. From there, school-age children can either hang from the overhanging rigging and work on building up their arm strength or scramble up and onto the net itself. The net is made of nylon-enclosed steel cabling, which is strong enough to hold a child's weight while also offering more comfortable surfacing spots for youngsters to grip their hands. The supporting framework is constructed of resilient galvanized steel which can be custom colored to best suit your site's design goals. Please call or email us to learn more about alternate colors. The Combination Manhole Rope Climber would be a great addition to a city or local park, schoolyard, or daycare facility.
