**Capacity:** 5-10

**Use Zone:** 21' 6" x 22' 2"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

There are many ways to play on the Freestanding Combination Manhole Rope Climber with Side Nets. Three supportive posts fasten together a variety of elements to create a dynamic climbing structure. On each of the three sides, kids can use the tightly woven vertical rope ladder to make it to the top. A metal manhole is placed in the center for an alternative way to ascend this play item. Scale the sides, top or middle! This nylon-encased steel rope climber is designed to offer several ways to have fun. Children can embark on their journey alone or invite some friends to join them on a trek to the top. Climbing is a key exercise for children as they develop key muscle groups and fine motor skills. As they use the arms and legs to propel themselves to the rope above, they are improving their planning and problem-solving abilities as well. Ask a AAA State of Play salesperson about color options to make it your own.
