- Advances body control and spatial awareness

**Age Group:** 5 to 12 years

**Capacity:** 3-7

**Use Zone:** 19' 5" x 22' 2"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The suspended rings of the Freestanding Floating Tunnel Climber are an irresistible draw to school-age children. By combining the fun of tunnels and the challenge of climbers, this structure inspires imaginative play while encouraging beneficial exercise. Nylon-covered steel ropes hold the rings in a way that offers mild movement in an effort to increase the difficulty for optimal physical exertion. Two powder-coated galvanized steel posts support five hanging rings with openings large enough for ages 5 to 12 to wiggle their way through. As kids traverse the installment, they are advancing their body control and spatial awareness. Additionally, maneuvering from one end to another targets key muscle groups and progresses strength. Little ones can pretend they are crossing a tottering bridge or jumping through flaming hoops like a circus animal. Whatever way they decide to play, it's sure to be a marvelous time. Add the Freestanding Floating Tunnel Climber to other Get Physical components for the ultimate customized playground.
