- Improves planning and strategic thinking skills

Age Group: 5 to 12 years

Capacity: 3-7

Use Zone: 17' 0" x 24' 8"

Two activities have been combined into one dynamic structure for the Freestanding Single Post Double Tilted Lily Pad Bridge with Net Attachment. Nylon-covered steel ropes and powder-coated galvanized steel beams create the rust-resistant and durable framework of this mini obstacle course. Children are invited to climb the vertical rope ladders or cross the lily pad bridge to advance their balance and coordination. The small footholds of the bridge are securely fastened to the ground to create an ideal tautness for challenging treks around the structure. This piece of equipment presents great physical and mental challenges to school-age children, progressing the development of planning, problem solving and strategic thinking abilities. As kids make their way through the elements, they are encouraged to play imaginatively and pretend to be on a journey over lava or through a treacherous jungle. Any way they choose to play, little ones are sure to enjoy their adventure and acquire beneficial developmental gains on the Tilted Lily Pad Bridge.
