COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Single Post Circle Overhead Swinging Ring Ladder presents an intriguing display of many elements. A circular overhead beam contains more than a dozen easily graspable handles. Kids are encouraged to get a firm grip and move hand-over-hand through the sequence of handles along the perimeter. They can also hold onto one spot and swing back and forth or side to side. Additionally, a smaller circular beam attached by two crossbars in an x-shape present climbers with another way to develop strength as they shimmy along the center of the structure. This installment is suitable for many children to play at once, promoting friendship, teamwork and imaginative play. It's perfect for adventurous young people who enjoy physical challenges on the playground. As kids enjoy scaling the various sections, they are building key muscles, improving their posture and learning more about body control. Ask a AAA State of Play salesperson about custom color options to really make this ring ladder your own.
